

AIRPORTS

EXECUTIVE SUMMARY

The Sacramento County Department of Airports (Department) Capital Improvement Plan (CIP) is comprised of projects that were identified and evaluated at a part of the Department's Capital Investment Master Schedule, which evaluates all critical equipment replacement, pavement and building rehabilitation at each of the four airports.

The Five-Year CIP estimated cost is \$251,766,400. The CIP will be funded by a combination of sources: Retained Earnings, Federal Funds, and annual earnings. Approximately \$203,197,000 or 81 percent of projects in the 5-year CIP are rehabilitation or replacement projects designed to maintain existing airport infrastructure.

Airport	5 Year CIP Total	Rehabilitation/ Replacement Projects	Percent Rehab or Replacement Projects in CIP
International	\$172,353,400	\$143,488,000	83%
Mather	\$62,408,000	\$43,704,000	70%
Executive	\$14,305,000	\$13,305,000	93%
Franklin Field	\$2,700,000	\$2,700,000	100%
Total	\$251,766,400	\$203,197,000	81%

The following list identifies key projects in the CIP for Fiscal Year 2017-18:

Sacramento International Airport

- Rehabilitate Runway 16R/34L Construction — **Estimated Total Cost: \$42,000,000**
- Replacement of Jet Bridges at Terminal A — **Estimated Total Cost: \$9,500,000**
- Shuttle Bus Replacement to Electric, Phase 1 Acquisition, Phase 2 Infrastructure — **Estimated Total Cost: \$5,100,000**

Mather Airport

- Rehabilitate the General Aviation Apron and Drainage Improvements — **Estimated Total Cost: \$9,439,936**
- Rehabilitate Asphalt/Concrete Section for Runway 4R/22L, Environmental and Design; Construction Part 1 and Part 2 — **Estimated Total Cost: \$21,000,000**

EXECUTIVE AIRPORT

Improve Safety Areas and Rehabilitation of Taxiways (C, D, E, H, M, N, and W)

6151 Freeport Boulevard, Sacramento, CA 95822

Project #1

Department: Airports (Executive Airport)

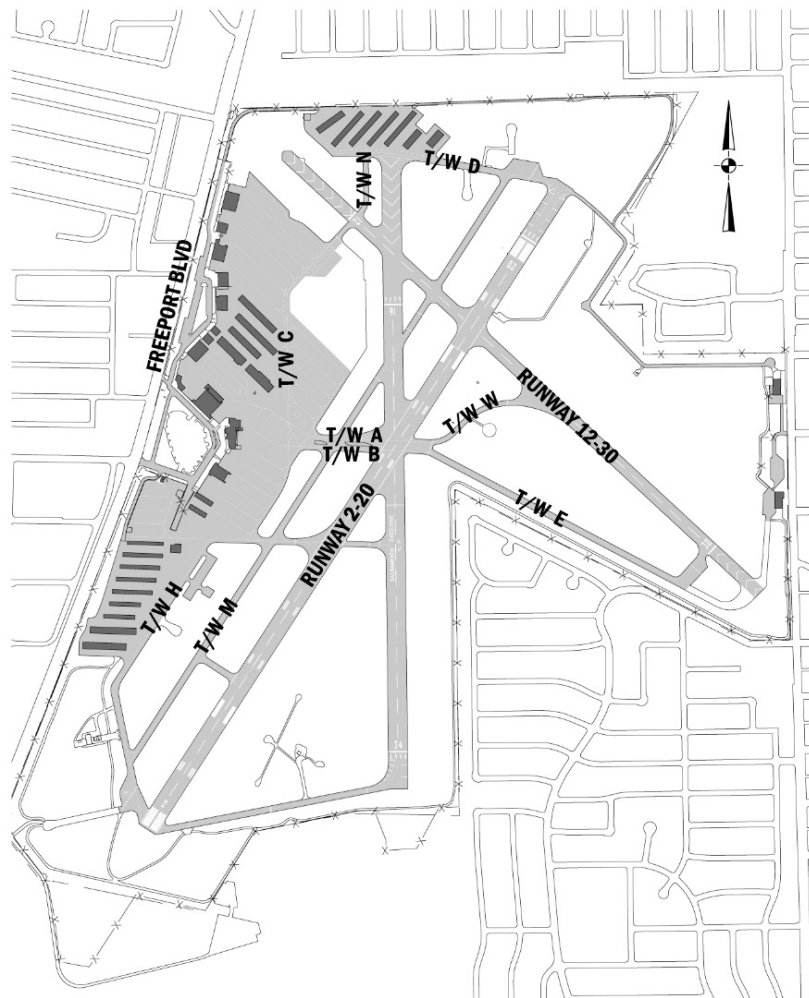

Estimated Project Cost: \$5,320,000

Expected Completion Date: 2022

Funding Sources: Airport Capital Improvement Fund

Project Description:

Design and construction of Taxiways C, D, E, H, M, N and W pavement rehabilitation and improvement needed to address irregularities within the runway and taxiway safety areas.

EXECUTIVE AIRPORT

Improve Safety Areas and Rehabilitation of Taxiways (C, D, E, H, N, and W)

Project Analysis:

Analysis Done	Analysis Results
Operating budget impact analyzed	This project will extend the service life of the taxiway pavements and reduce future maintenance cost as well as meeting Federal Aviation Administration runway and taxiway safety area requirements. This project will be funded by the Airports Enterprise Fund and a FAA Airport Improvement Program grant.

EXECUTIVE AIRPORT

Overlay Airport Roadways, Construction

6151 Freeport Boulevard, Sacramento, CA 95822

Project #2

Department: Airports (Executive Airport)

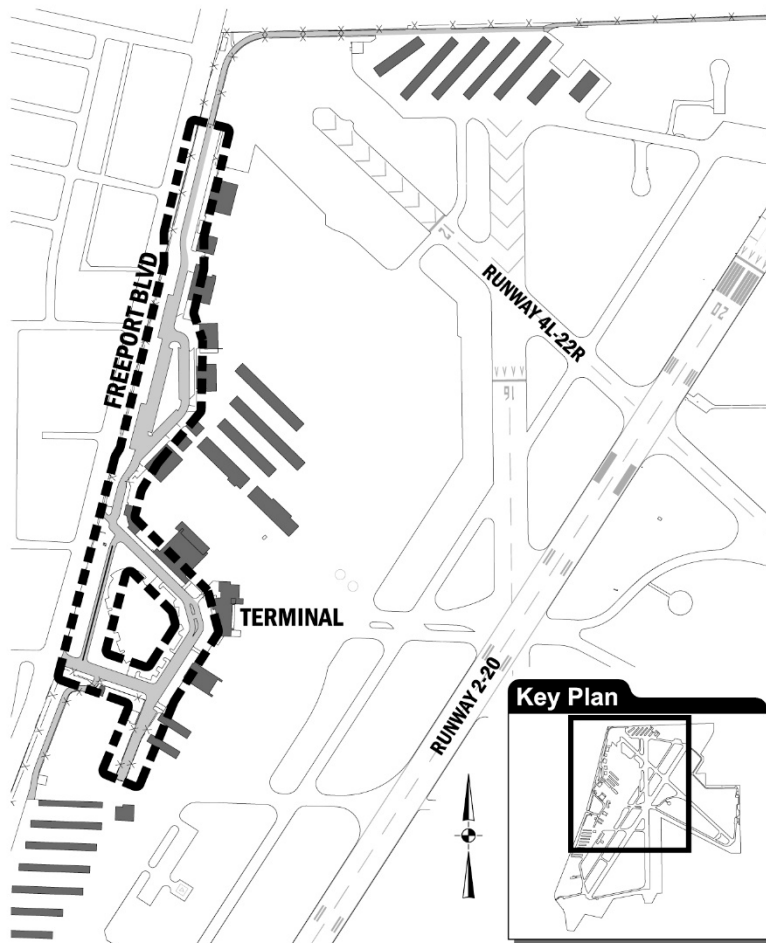

Estimated Project Cost: \$800,000

Expected Completion Date: 2019

Funding Sources: Airport Capital Improvement Fund

Project Description:

The project will overlay the Airport roadways to extend their useful life. The roadways provide public access to airport parking facilities, the terminal, as well as tenant facilities located along Freeport Boulevard.

EXECUTIVE AIRPORT

Overlay Airport Roadways, Construction

EXECUTIVE AIRPORT

Rehabilitate Runway 2/20 Pavement and Runway Safety Area (RSA) Improvements, Environmental and Design, Construction

6151 Freeport Boulevard, Sacramento, CA 95822

Project #4

Department: Airports (Executive Airport)

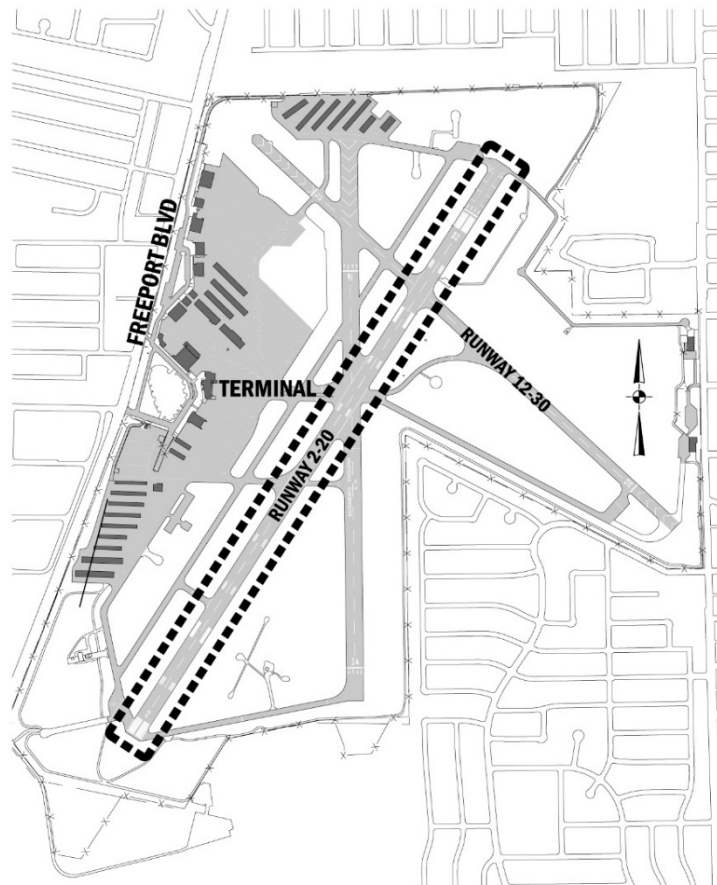

Estimated Project Cost: \$4,385,000

Expected Completion Date: 2020

Funding Sources: Airport Capital Improvement Fund

Project Description:

Project intends to rehabilitate the pavement of Runway 2/20 and improve the runway safety area to meet Federal Aviation Administration requirements. The project will be implemented in two phases with the first phase being the environmental review and design phase and the second phase being the construction phase of runway pavement rehabilitation. Work associated with runway safety area improvements is summarized in Project #7.

FRANKLIN FIELD AIRPORT

Rehabilitate Aircraft Parking Apron

10480 Bruceville Road, Sacramento, CA 95757

Project #1

Department: Airports (Franklin Airport)

Estimated Project Cost: \$1,050,000

Expected Completion Date: 2019

Funding Sources: Airport Capital Improvement Fund and Federal Funds

Project Description:

This project includes the environmental review, design and construction of the pavement rehabilitation of the aircraft apron. Rehabilitation of the aircraft apron is needed in order to extend the service life of the pavement and reduce future maintenance needs.

Analysis Done	Analysis Results
Operating budget impact analyzed	The purpose of this project is to enhanced navigational aids capabilities for the main runway to reduce diversions of cargo operations during periods of inclement weather. This project is needed in order to reduce the future maintenance cost and will be funded by the Airports' Enterprise Fund.

Truemper Way, Design, Upgrades and Extension

10425 Norden Avenue, Mather, CA 95655

Project #5

Department: Airports (Mather Airport)

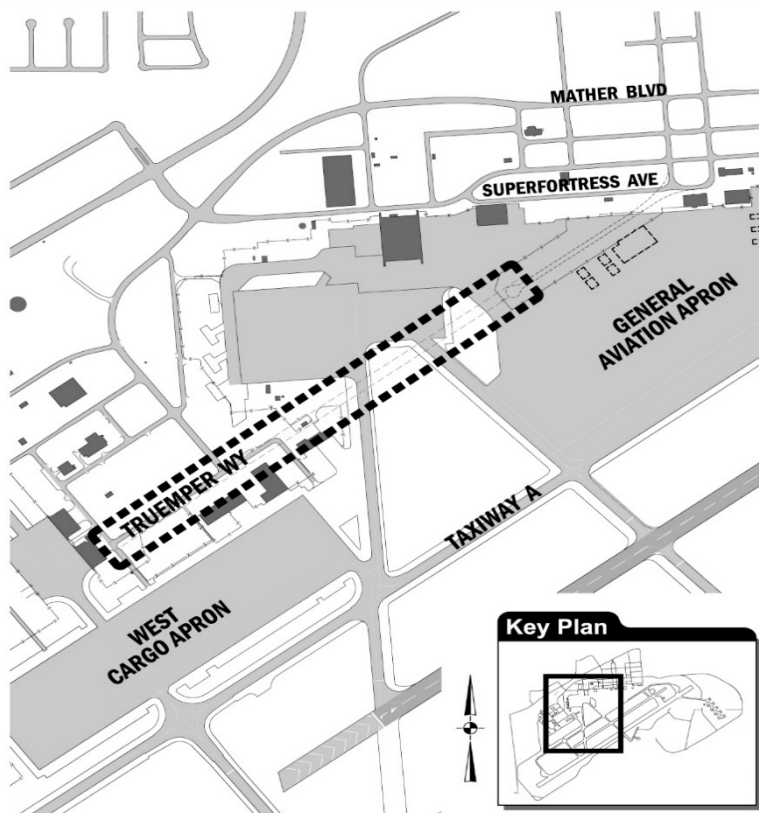

Estimated Project Cost: \$6,541,632

Expected Completion Date: 2019

Funding Sources: Airport Capital Improvement Fund

Project Description:

Planned for Fiscal Year 2016/17 into 2017/18 was upgrade of Truemper Way adjacent to the air cargo apron. These upgrades included wider roadway, sidewalks, curb and gutter as well as upgraded utilities under the pavement to service existing tenants and future development. Phase two Truemper Extension includes the roadway extension, underground utilities and other infrastructure upgrades.

Project Analysis:

Analysis Done	Analysis Results
Operating budget impact analyzed	This multi-year project includes the design and construction of pavement rehabilitation and the extension of Runway 4L/22R to the west. Funding in Fiscal Year 2017-18 is for environmental and design with construction being planned for Fiscal Year 2019-20. This project is necessary and needs to be completed in order to initiate the temporary closure of the main runway, Runway 4R/22L, for major pavement rehabilitation. This project will be funded by the Airports' Enterprise Fund, and the Airports' plans to seek Airport Improvement Program funding to supplement funding needs.

Rehabilitate Asphalt/Concrete Section for Runway 4R/22L, Environmental and Design; Construction Part 1 and Part 2

10425 Norden Avenue, Mather, CA 95655

Project #7

Department: Airports (Mather Airport)

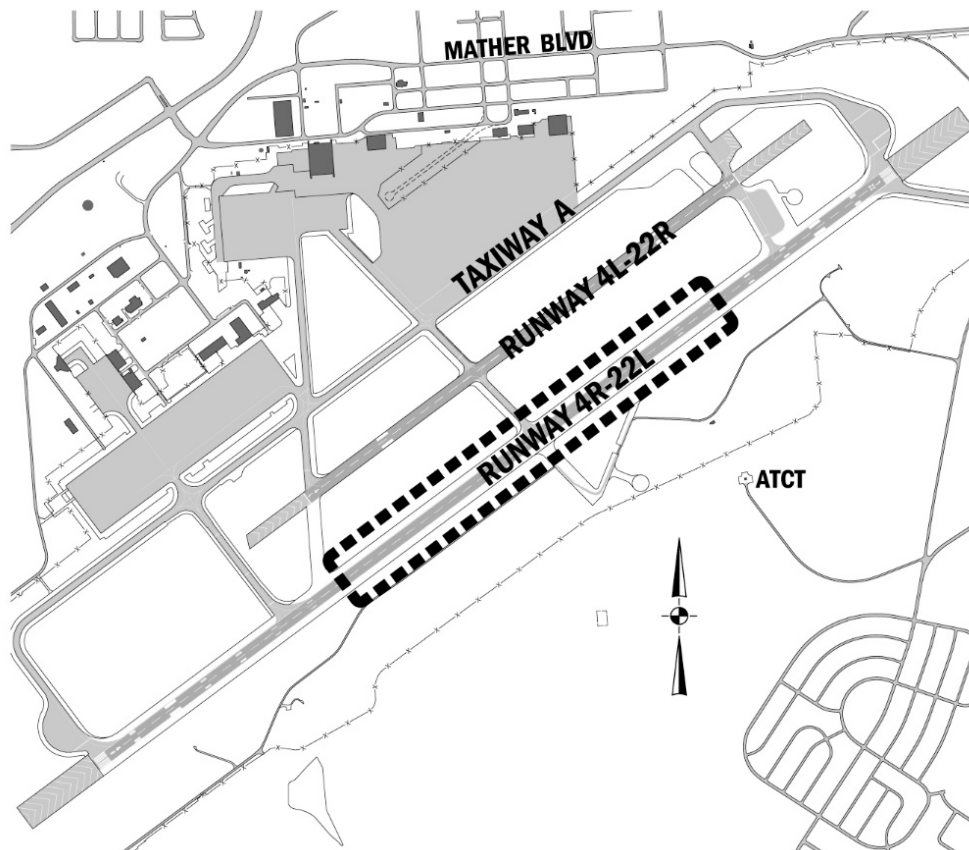

Estimated Project Cost: \$21,000,000

Expected Completion Date: 2022

Funding Sources: Airport Capital Improvement
Fund and Federal Funding

Project Description:

This project will rehabilitate the asphaltic concrete section of Runway 4R/22L to comply with Federal Aviation Administration (FAA) Advisory Circular 150/5300-13A Airport Design.

Project Analysis:

Analysis Done	Analysis Results
Operating budget impact analyzed	This multi-year project includes the design and construction of rehabilitated asphalt concrete section for Runway 4R/22L. Funding in Fiscal Year 2017-18 is budgeted for environmental review and design, and construction is planned for Fiscal Year 2020-21. The pavement rehabilitation is needed to reduce future maintenance costs and will be funded by the Airports' Enterprise Fund, additionally, the Department plans to seek Airport Improvement Program grant funding to supplement funding needs.

MATHER AIRPORT

Repair of Localized Failed Pavement Sections of Runway 4R/22L

10425 Norden Avenue, Mather, CA 95655

Project #8

Department: Airports (Mather Airport)

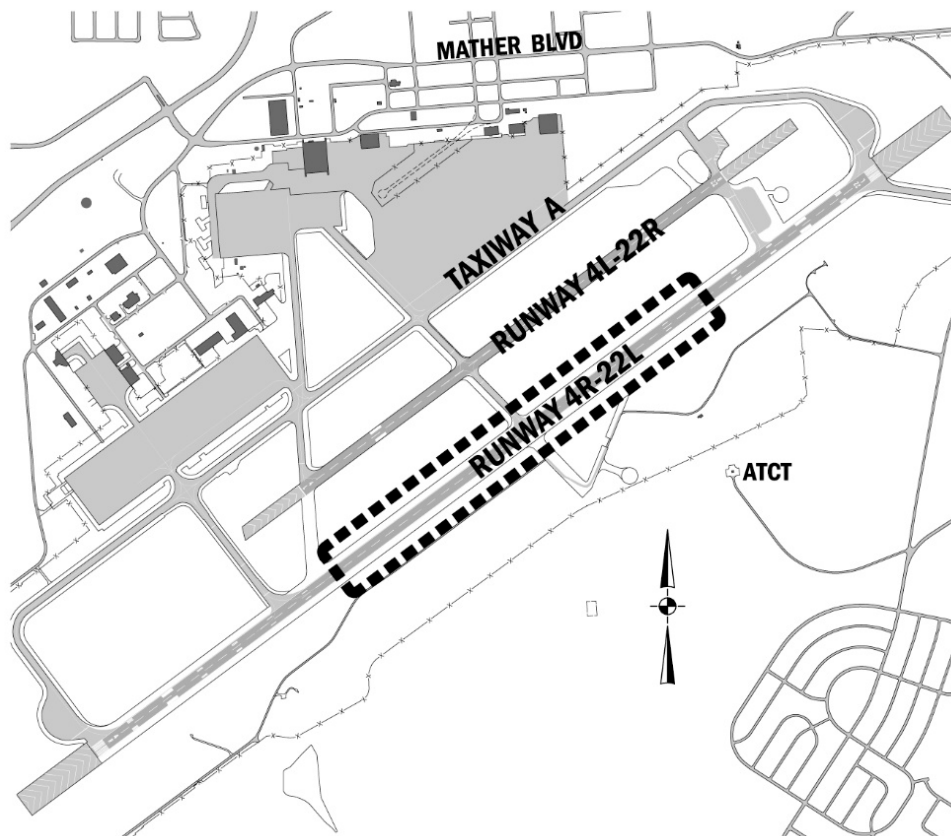

Estimated Project Cost: \$2,000,000

Expected Completion Date: 2018

Funding Sources: Airport Capital Improvement Fund

Project Description:

The project will repair the failed pavement sections of Runway 4R/22L.

Project Analysis:

Analysis Done	Analysis Results
Operating budget impact analyzed	This project is needed to ensure the existing pavement section will support the added aircraft traffic while a second runway, Runway 4L/22R, is closed for extension and pavement rehabilitation. This project will be funded by the Airports' Enterprise Fund.

Rehabilitate Taxiway "B" North

3745 Whitehead Street, Mather, CA 95655-4100

Project #1 New

Department: Airports (Mather Airport)

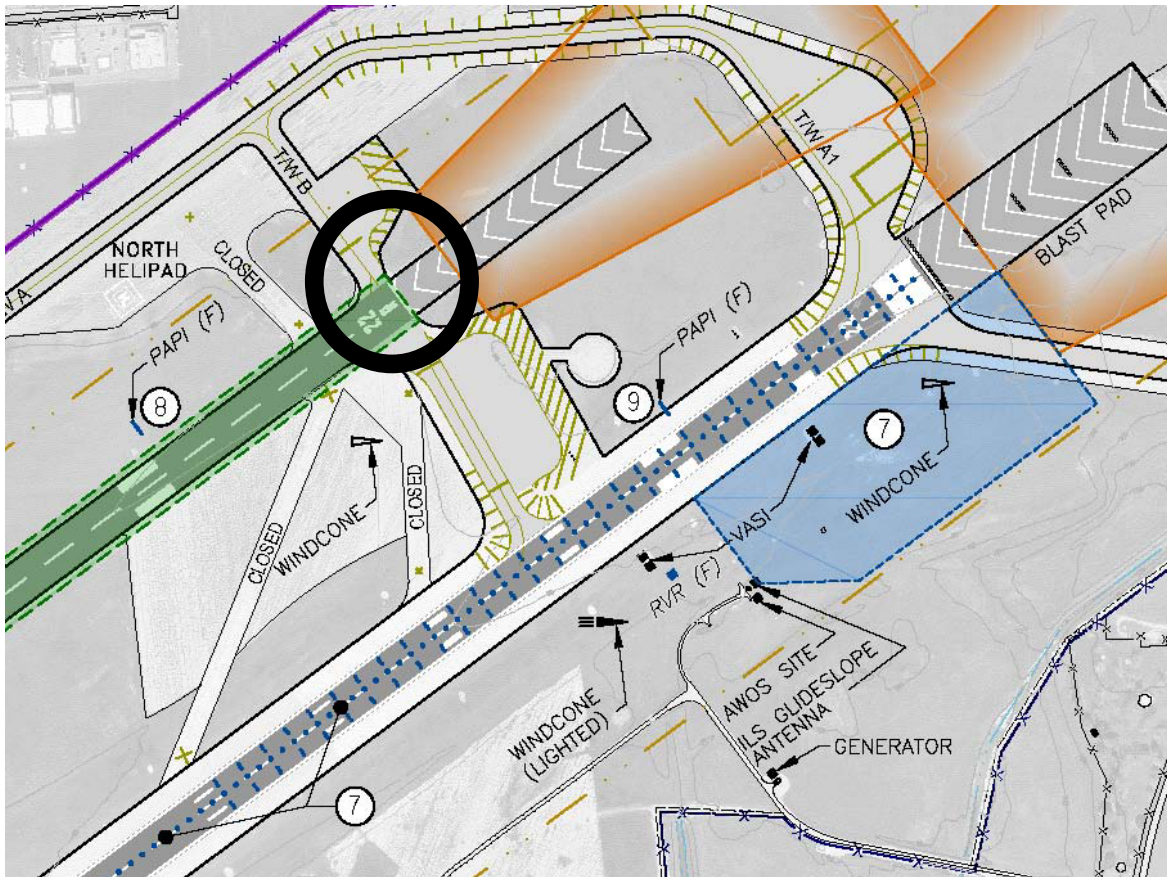

Estimated Project Cost: \$1,627,320

Expected Completion Date: 2017

Funding Sources: Airport Capital Improvement Fund and Federal Funds

Project Description:

This project will rehabilitate the northern portion of Taxiway B, which connects Taxiway A and the general aviation area to both runways. The conditions of the taxiway necessitate rehabilitation at this time.

Automated Passport Control Equipment

6900 Airport Boulevard, Sacramento, CA 95837

Project #2

Department: Airports (International Airport)

Estimated Project Cost: \$187,000

Expected Completion Date: 2018

Funding Sources: Airport Capital Improvement Fund and Federal Funds

Project Description:

Automated Passport Control (APC) is a U.S. Customs and Border Protection (CBP) program that expedites the entry process for U.S., Canadian and eligible Visa Waiver Program international travelers by providing an automated process through CBP's Primary Inspection area. Travelers use self-service kiosks to respond to CBP inspection related questions and submit biographic information. APC is a free service, does not require pre-registration or membership, and maintains the highest levels of protection when it comes to the handling of personal data or information.

Operating budget impact analyzed	This project will ensure the airlines have the appropriate equipment to meet their operational needs as well as reducing maintenance calls and costs. The project is funded by the Airports' Enterprise Fund.

Economy Lot Rehabilitation, Design and Construction Phase 1

6900 Airport Boulevard, Sacramento, CA 95837

Project #6

Department: Airports (International Airport)

Estimated Project Cost: \$5,150,000

Expected Completion Date: 2019

Funding Sources: Airport Capital Improvement Fund

Project Description:

Project will design and construct drainage improvements for the north portion of the Economy Lot to minimize the seasonal closures due to excessive ponding in various areas including non-pavement. The subsequent phase will pave the currently unpaved portion of the lot. Ultimately this project will produce a drainage and pavement study for future use.

Physical Plant Maintenance Building Parking Lot and Traffic Flow Access Improvements

6900 Airport Boulevard, Sacramento, CA 95837

Project #18

Department: Airports (International Airport)

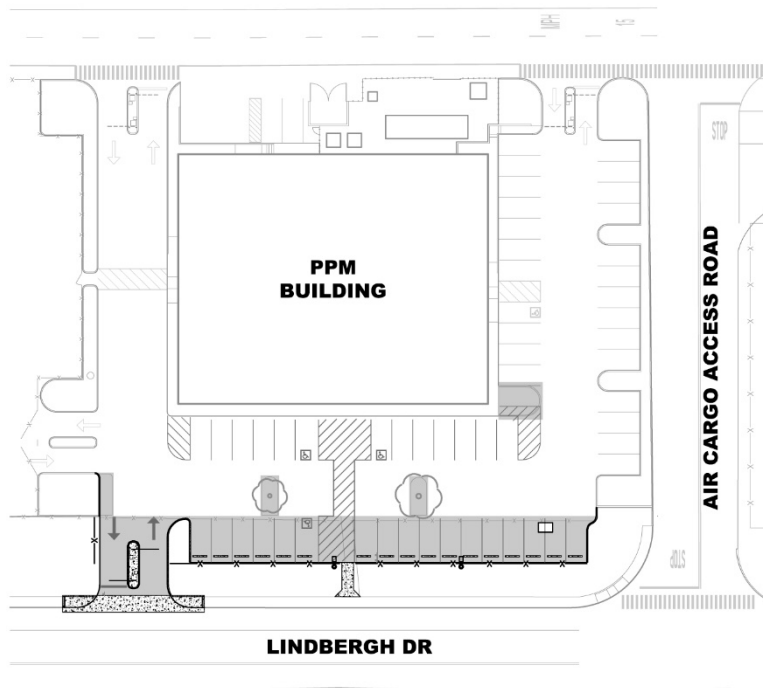

Estimated Project Cost: \$0

Expected Completion Date: 2018

Funding Sources: Airport Capital Improvement Fund

Project Description:

This project will modify the vehicle access to the Physical Plant Maintenance building, currently housing Airport staff, add a new driveway from Lindbergh into the parking lot, and provide additional parking spaces. The new driveway will alleviate the interactions between commercial and passenger vehicles, as both commercial and passenger vehicles share Air Cargo Access Road as the primary ingress and egress access, and ensure a safe environment for all users while still maintaining operational requirements.

Project #29

Department: Airports (International Airport)

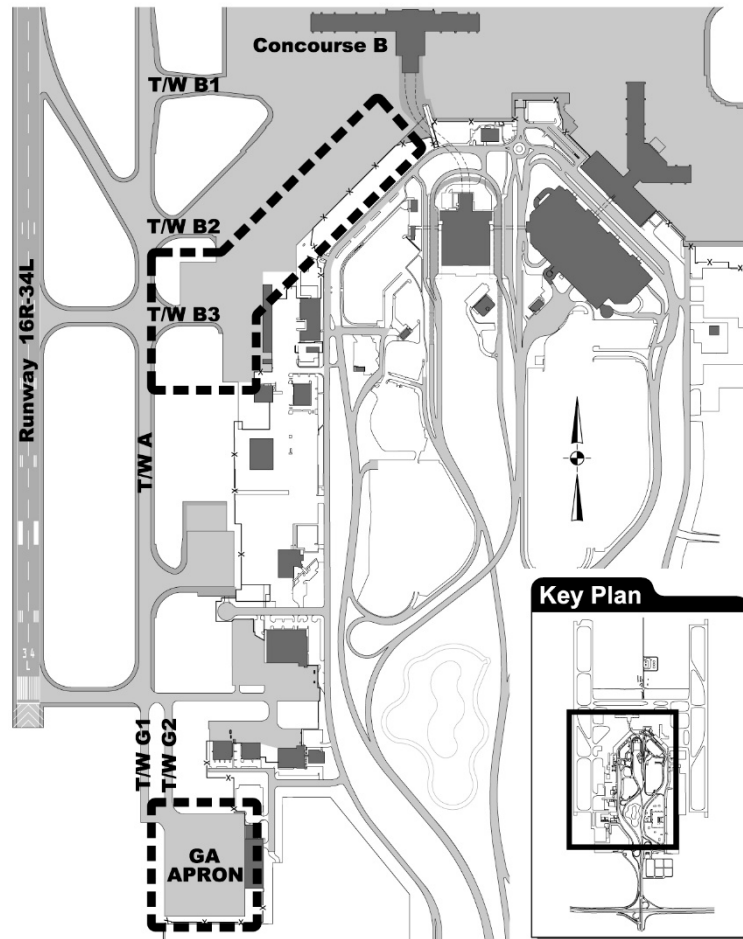

Estimated Project Cost: \$12,000,000

Expected Completion Date: 2021

Funding Sources: Airport Capital Improvement Fund and Federal Funds

Project Description:

The multi-year project will rehabilitate the pavement of the Terminal B, Air Cargo and General Aviation Aprons.

Rehabilitate Taxiway D and Connections to Runway 16L (East Taxiways Improvements)

6900 Airport Boulevard, Sacramento, CA 95837

Project #3 New

Department: Airports (International Airport)

Estimated Project Cost: \$37,626,774

Expected Completion Date: 2017

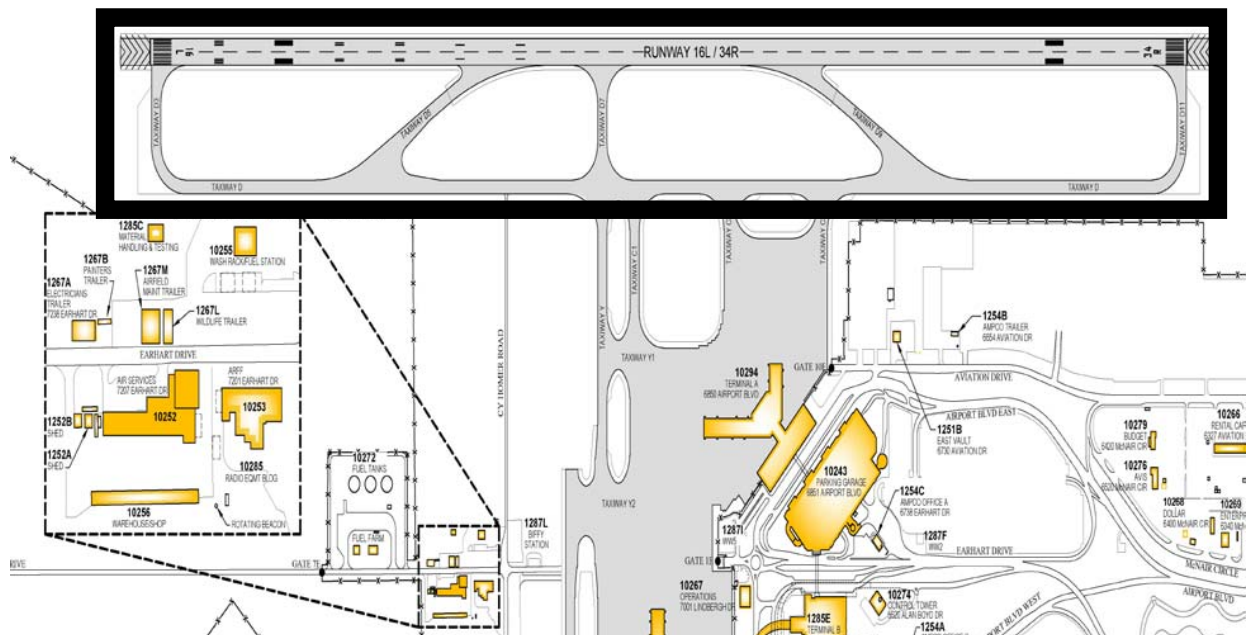

Funding Sources: Airport Capital Improvement Fund and Federal Funds

Project Description:

This project will construct a strengthening overlay of existing Taxiway "Delta" and connecting taxiways between "Delta" and Runway 16L/34R of the east Taxiway complex. This work will maintain and extend the life of the existing taxiway pavements. The project will also construct shoulders for Taxiway "Delta", connecting taxiways between "Delta" and Runway 16L/34R, and portions of Taxiway "Yankee". Recent revisions to Federal Aviation Administration (FAA) design standards require paved shoulders for taxiways at SMF.

This project also included the installation of electrical duct for future Surface Movement Guidance Control System (SMGCS). Current standards include provisions for SMGCS lighting to provide guidance for aircraft movement between the terminal areas and runways during inclement weather. While not required at this time, installation of the duct prior to overlaying the taxiways will reduce future costs and eliminate additional closures of taxiways and runways.

The project will also construct the remaining portion of Taxiway W as well as the removal of a small portion of Taxiway Y to comply with FAA design standards.

Terminal A Compactor Site Improvements

6900 Airport Boulevard, Sacramento, CA 95837

Project #6 New

Department: Airports (International Airport)

Estimated Project Cost: \$200,533

Expected Completion Date: 2018

Funding Sources: Airport Capital Improvement Fund

Project Description:

This project will install 1 additional trash compactor at Terminal A, bringing the total number to 3 compactors. The 3rd compactor would be utilized as a food waste compactor. Price includes cost of the compactor and infrastructure. Assembly Bill 1826 was signed into law and becomes effective April 1, 2016. At that time, State law requires businesses that generate a specified amount of organic waste per week to have an organic waste recycling program. This compactor will assist in compliance with this new law. Additionally, the new compactor will be a direct feed unit resulting in the need for fewer staff hours devoted to manually feeding a compactor.

Project #9 New

Department: Airports (International Airport)

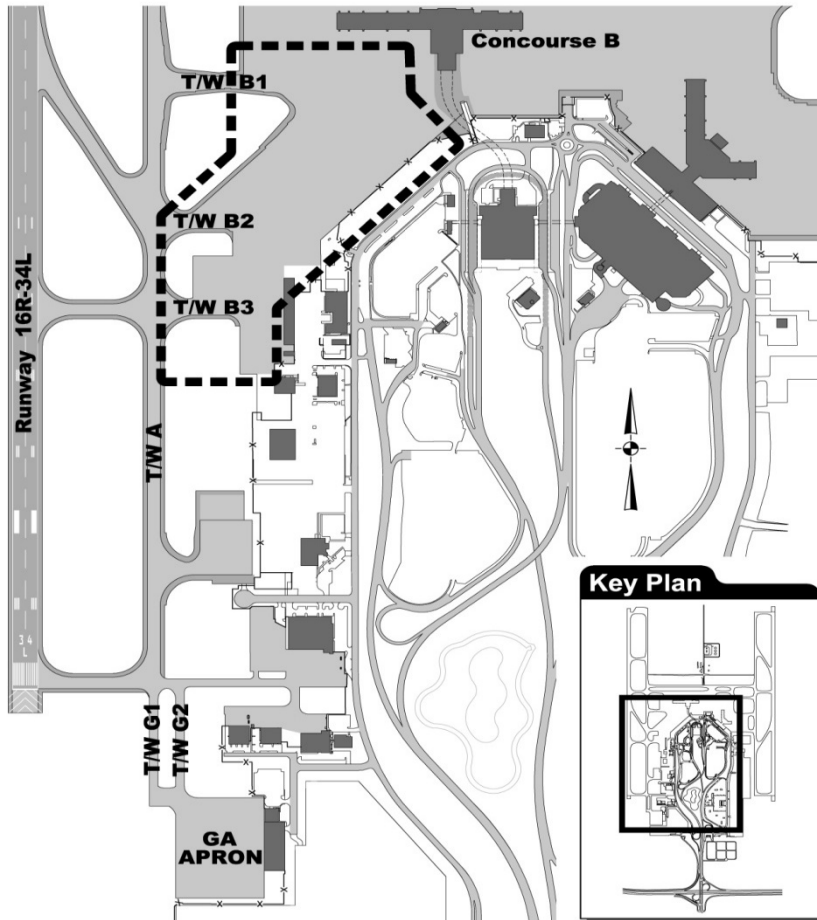

Estimated Project Cost: \$4,600,000

Expected Completion Date: 2017

Funding Sources: Airport Capital Improvement Fund

Project Description:

Rehabilitate a portion of the West Apron Pavement at SMF to provide Remain Overnight Parking (RON) for approximately five Airplane Design Group (ADG) III, five ADG IV and two ADG V aircrafts. The work for this project consist of realignment of Taxilane B2, Portland cement concrete pavement (PCC) pavement restoration, new pavement markings and demolition of existing electrical items. In addition, this project includes installation of high mast lights for the West Apron and construction of a new Fed-Ex Concrete Apron near Taxilane B3.
